2651 ROMANA IR TV UNIT

The Romana IR TV unit features a cupboard section for storing Digital boxes and two drawers for additional storage. The “IR eye” enables you to use your remote control with your Digital and satellite boxes when stored out of sight behind the closed wooden doors. The front edge of the TV cabinet frame bear the signature soft curve, and the legs have the fluid organic curves and chamfers that, characterise Romana. Fluid wave-shaped cut-out recesses provide the door and drawer handles, another design signature of the range. The cupboard section has an adjustable glass shelf, the two drawers and the door hinges have soft-close mechanisms to give a gentle shut. In the back there is a cut-out for cable access. The IR receiver works with remote controls operating in the 20 – 70 kHz range. This oak furniture is finished in a clear matt lacquer to show the beauty of the natural timber.

TECHNICAL SPECIFICATIONS
