

Thank you for purchasing this Noto recliner. Please ensure instructions are read in full before attempting to operate this product.

Preparation

This is a one person operation, please note to operate manual recliners correctly, the reclining chair relies on the user to sit as far back as possible, allowing the users body weight to be positioned at the mid-point of the chair.

This chair is heavy, take care when using to avoid personal injury and (or) damage to the product.

PLEASE NOTE: THE RECLINER CHAIR SHOULD NOT BE OPERATED BY CHILDREN.

Operation should be carried out exactly according to the instructions, otherwise a safety risk can occur if incorrectly used.

Read this leaflet in full before use.

Positions your Noto recliner can be used in

Position A - Closed

Position B - Relaxed

Position C - Fully Reclined

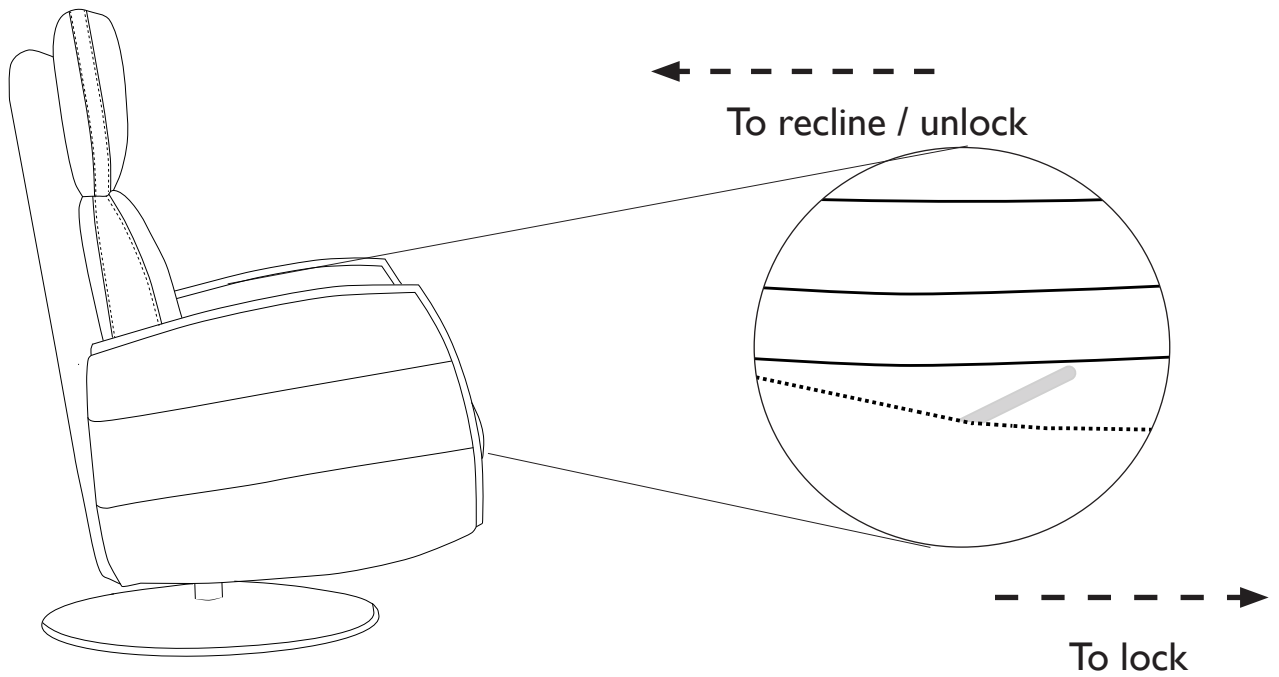

How to operate

1. Starting in a closed position, sit comfortably in the reclining chair, ensuring you are sitting as far back as possible.

2. When reclining your chair, hold the wooden armrests either side using both hands whilst simultaneously pushing back until it smoothly reclines into the relaxed reclining position.

3. To control the position of the chair, pull the chrome lever towards you. Move the chrome lever in the opposite direction (away from you) to lock the position.

PLEASE NOTE: The chrome lever is located inside the arm.

4. Use the lever as shown above, whilst still applying pressure in the direction shown below to move the back and footrest.

5. Pull the lever to recline. Find where comfortable and ensure it is locked into place.

6. To return to a relaxed position, pull the lever towards you to unlock and sit upright carefully ensuring your body weight is in the central position and not too far forward.

7. To return to the closed position apply a light downwards pressure on the footrest, the recliner will return to its closed position. The lever will slowly return to its locked position (shown below). **Always ensure the lever is in its locked position after use.**

Operating the headrest

1. Starting with the chair in the closed position push the headrest in the direction shown below, repeat steps above to find chosen reclining position.

Wood Furniture

Wood displays different grain patterns depending on which way it is cut - for example, the 'medullary ray' which can appear on oak furniture is a mark of good quality timber - these are characteristics of the natural beauty of the wood. All timber surfaces will change colour and mellow over time. New furniture will initially vary in shade from items that have been previously purchased.

How to care for your wood furniture

Furniture with a hard lacquer, wax polish or painted surface should be dusted with a dry cloth. When using the surface for serving food and drinks it is best to use protective mats and coasters. Spillages should be wiped up as soon as possible. Spray polishes should be avoided as they can contain silicones which may spoil the furniture's surface by building up over time. Use of cleaning materials containing abrasive compounds, acidic or caustic reagents and any bleaches containing oxidising reagents should be avoided as prolonged use may damage the lacquer surface. If sticky marks occur on the surface they can be removed with a dilute solution of warm soapy water. The area should be rubbed lightly and then completely dried immediately afterwards, before replacing any mats etc. Our furniture will endure most temperatures in the home but it is best to avoid placing furniture next to heat sources such as radiators or fires. Be particularly careful with solid wood as the lack of humidity caused by central heating can cause damage, such as warping.

Safety Instructions

Never drag furniture when moving it, always lift it. Take care when handling or moving the furniture as careless handling may cause damage or injury. No liability will be accepted for damage or injury caused by incorrectly installed furniture.

Fabric Care

Every effort is made to keep colours consistent between batches, but fabric manufacturers cannot guarantee exact matching. All fabrics will fade in sunlight, to prolong the life of the fabric do not place it close to a heat source or in direct sunlight. Plump up cushions after use, especially fibre or feather cushions. If the cushions are reversible turn them at least once a week to minimise wear and maintain their appearance. To prevent dust and dirt accelerating wear, gently vacuum upholstery once a week or use a soft brush. For complete cleaning we recommend a specialist cleaning in situ. Accidental spills and stains should be treated as soon as possible, except mud which should be left to dry and then brushed off. Remove any solids, then blot up as much liquid as possible with white paper towel or a clean cloth. We recommend professional dry cleaning but some action can limit damage.

Leather Care

As leather is a natural product, each hide will have its own individual characteristics - grain pattern, texture and colour will vary from hide to hide and even within the same hide. All of which contribute to the natural beauty and softness of the hides. Keep your leather furniture at least 40cm away from any heat source and if possible avoid exposure to direct sunlight preventing colour fading, dehydration and cracks. Leather furniture in a normal domestic environment should require little attention. Cleaning should only be done when necessary. We advise that the leather should be regularly dusted. At least twice a year the surface should be wiped over with a damp cloth, with special attention paid to crevices where dust and dirt could be a cause of hidden wear. Do not apply any chemical or abrasive products. If you have a spillage on your leather furniture, act immediately and dab off any excess liquids and solids, then contact a specialist leather cleaning company.
